3rd Sustainability Forum 2026

2023 – Foundations | 2024 – Global Reach | 2026 – Systems, Finance & Net-Positive Impact

In 2023, our inaugural forum united global leaders to lay the foundations for sustainable growth.

In 2024, we went global; spotlighting finance, AI, regenerative agriculture, and the circular economy.

In 2026, we mandate the transition: re-engineering business models, supply chains, and the talent ecosystem to accelerate value creation and embed net-positive strategies into systemic innovation.

The Regenerative Edge

Decouple growth from carbon. Hardwire resilience into global supply chains.

This summit is your blueprint to **rethink** business as "living" ecosystem, **unlock** regenerative finance through green bonds and blended capitals and **lead** the net positive

The Future Doesn't Need to Be Sustainable. It Must Be Regenerative.

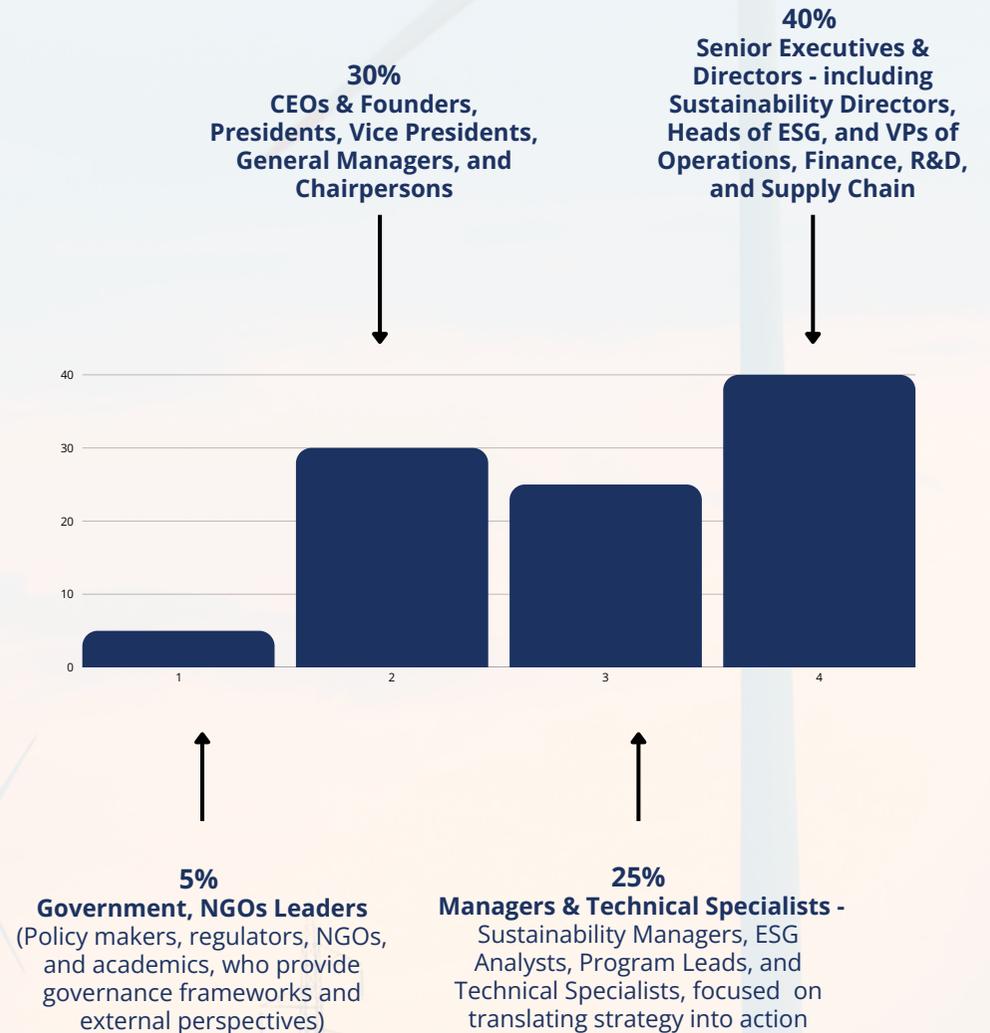

The world is moving beyond sustainability. The next frontier is regeneration where business creates systems that restore, renew, and generate net-positive impact.

From AI-powered digital twins to regenerative finance, the Regenerative Business Innovation Summit 2026 challenges global leaders to re-engineer growth itself.

Attendees

Job Function Breakdown

Conference

3rd Sustainability Forum 2026

Re-engineering business models, supply chains, and ecosystems to accelerate a regenerative economy.

Gain the latest global and regional insights that can **reshape your organization's sustainability strategy, drive new growth markets, and accelerate your shift to a greener, more resilient future.**

The 3rd Sustainability Forum 2026 is your gateway to the next era of business; where strategy meets systemic design.

Join Australia's top sustainability leaders, policymakers, and innovators as we redefine value creation, decouple growth from carbon, and hardwire resilience into every supply chain.

By Attending, You will Gain

- Practical ideas to strengthen sustainability execution across your business
- Insights from leaders working on resilience, circularity, reporting, and regenerative strategy
- Examples you can use to brief leadership, engage stakeholders, and build momentum internally
- Connections with peers facing the same delivery pressures
- A clearer view of where sustainability is creating commercial, operational, and reputational value

The Market Opportunity: Scaling the Regenerative Economy

- Sustainable finance: Rising from USD 23B in 2024 to USD 98B by 2030 (27.4% CAGR).
- Renewable energy: Surging from USD 32.7B in 2023 to USD 118.5B by 2030 (20.2% CAGR).
- Capacity growth: 52 GW of new renewable power by 2030; lifting renewables to 57% of electricity, with a target of 82% by 2030.

Against this momentum, the **3rd Sustainability Forum 2026** acts as a **Blueprint for a Resilient Future**, translating growth markets into **practical pathways to net zero and regenerative business ecosystems.**

Forum Focus Areas

The forum explores the priorities shaping the next phase of sustainable business, turning sustainability into stronger strategy, measurable progress, and long-term value.

Key themes include:

- **Finance and investment**

Financing models and nature-positive strategies driving business value.

- **Supply chain decarbonisation**

Practical approaches to Scope 3, transparency, and carbon reduction.

- **Resilient business models**

How regenerative thinking supports growth, resilience, and competitiveness.

What Executives and Decision-Makers Can Expect

Over two high-impact days, the forum brings together policymakers, executives, innovators, and investors to gain investment intelligence, cross-industry strategies, and actionable insights designed to embed sustainability at the core of high-performance, future-ready business ecosystems.

Attendees will:

- 1** *Explore capital markets, sustainable finance, and pathways to supply chain decarbonization*
- 2** *Accelerate renewable energy investments and climate-positive innovations*
- 3** *Build regenerative business ecosystems that deliver resilience and growth*
- 4** *Gain strategic insights from industry leaders in the CEO Panel: The Planet-positive Mandate topics like The Green Premium*
- 5** *Engage in collaborative roundtables on AI-driven climate adaptation, zero-emission innovation, and phasing out virgin inputs*

Beyond the Forum: A Movement for Change

The **3rd Sustainability Forum 2026** is more than a two-day event; it is part of a growing movement reshaping how businesses, governments, and communities approach the regenerative economy. What begins at the summit continues through ongoing collaborations, knowledge exchange, and actionable projects that extend far beyond the stage.

As markets expand and ROI-driven opportunities accelerate, we are building a community of leaders committed to turning regeneration into a **long-term competitive advantage**. Together, we're not just preparing for a net-zero future, we're creating a net-positive one.

WHO IS THIS FOR

This forum is designed for decision-makers and senior practitioners across:

- Sustainability and ESG
- Operations and transformation
- Supply chain and procurement
- Strategy and innovation
- Finance and investor-facing functions
- Infrastructure, transport, energy, manufacturing, resources, and government

WHO PARTNERS WITH US

The Forum attracts solution providers and changemakers shaping the next generation of sustainable business:

- Sustainability reporting & assurance providers
- Risk & compliance advisory firms
- Renewable energy providers (solar, wind, hydrogen, bioenergy)
- Smart infrastructure & green building companies
- Circular economy solution providers
- ESG software platforms (carbon accounting, Scope 3 measurement, double materiality)
- AI & analytics providers for sustainability data
- Cloud & digital transformation companies (Microsoft, Google Cloud, AWS, IBM)
- Sustainable finance & green investment funds
- Venture capital firms investing in cleantech & sustainable innovation
